

Vande Bharat Oxy Park: A Green Oasis in Balotra

In 2024-25, Arpan Seva Sansthan, in collaboration with Syngenta India Private Limited, developed the "Vande Bharat Oxy Park" near the Railway Station in Balotra, Rajasthan. This transformative project, with an investment of over 150 Lakhs, has revitalized a once neglected area into a vibrant community space.

Key Features

- Green Space: A lush area spanning 1.25 acres, featuring 1550 plants to enhance the local environment
- Walking Track: A 675 meter track for community recreation and fitness
- Public Amenities: Includes toilets and drinking water facilities, addressing essential WASH (Water, Sanitation, and Hygiene) needs
- Environmental Impact: Conversion of a former garbage-filled area into a clean, green lung for the city

Community Benefits

- Improved air quality and green cover for Balotra
- Enhanced public health through recreational spaces and hygiene facilities
- Beautification of the city landscape
- Creation of a community gathering space

Sustainability

Upon completion, the park will be handed over to Nagar Parishad, Balotra, ensuring long-term maintenance and community ownership.

Alignment with Sustainable Development Goals
