FOREWORD

As we present Arpan Seva Sansthan's Annual Report for 2024-25, we find ourselves at a critical juncture in global development. The world is increasingly recognizing the urgent need for sustainable practices, climate action, and inclusive growth. In this context, Arpan Seva Sansthan's work has never been more relevant or crucial.

Our organization stands at the forefront of rural transformation, aligning our efforts with India's national development commitments and global sustainability goals. We recognize that rural development is not just about economic growth, but about creating resilient communities that can thrive in a changing world.

This year, we've redoubled our efforts to contribute to India's ambitious net-zero targets. Our ecological restoration initiatives have reduced carbon emissions by 80 lakh+ kg, demonstrating that grassroots actions can have significant impact on climate change mitigation. By promoting sustainable agriculture, water conservation, and renewable energy adoption, we're helping rural communities adapt to and combat climate change.

Our work increasingly embodies Environmental, Social, and Governance (ESG) principles. Environmentally, we've constructed water harvesting structures storing over 1,00,000+ cubic meters of water, promoting water security in water-stressed regions. Socially, we've empowered communities through education initiatives, reaching over 1,00,000+ students across 700 schools with quality education and infrastructure. In terms of governance, we've strengthened local institutions, with 25% of women now holding leadership roles in Water User Associations.

Arpan Seva Sansthan's holistic approach to development aligns seamlessly with the UN Sustainable Development Goals (SDGs). Our initiatives in sustainable agriculture, clean water, quality education, gender equality, and climate action directly contribute to multiple SDGs. By localizing these global goals, we ensure that our interventions are contextually relevant and impactful.

In the realm of sustainable livelihoods, we've made significant strides. Our ASTHA model has increased agricultural productivity by up to 25%, enhancing food security and farmer incomes. We've introduced farmers to floriculture with beekeeping, strawberry cultivation and established poultry units for 90 households, diversifying rural income sources. These efforts not only boost local economies but also build resilience against economic shocks.

As we look to the future, Arpan Seva Sansthan is committed to leveraging technology and innovation for rural development. From smart classrooms to efficient water filtration systems, we're bridging the rural-urban divide and preparing communities for the challenges and opportunities of the 21st century.

Our partnerships with government bodies, corporate CSR initiatives, and civil society organizations have been instrumental in scaling our impact. We believe that collaborative, multi-stakeholder approaches are key to achieving sustainable development and meeting India's climate commitments.

As we move forward, Arpan Seva Sansthan pledges to continue its work towards creating sustainable, equitable, and climate-resilient rural communities. We envision a future where rural India is not just a beneficiary of development, but a driving force for sustainable growth and innovation.

The challenges ahead are significant, but so are the opportunities. With the continued support of our partners, the dedication of our team, and the resilience of the communities we serve, we are confident in our ability to create lasting, positive change.

Together, let us build a future where rural prosperity goes hand in hand with environmental sustainability and social equity.

Dr. Subh Karan Singh
President, Arpan Seva Sansthan

About Us- ARPAN SEVA SANSTHAN

Arpan Seva Sansthan is a non - profit organization, registered under the Rajasthan Societies Registration Act 1958, was brought up in shape on 29th March 1996. It was formed by a team of young professionals who had the dedication & commitment to serve rural community and bring about positive societal change. ARPAN was brought into existence with the purpose of ensuring access of community to secured livelihood opportunities.

Arpan has 29 years of experience in developmental sector mainly in the field of Water resources management, Livelihood enhancement, Improved agriculture & horticulture interventions, Livestock management, Drinking water, Health and sanitation/ WaSH, Capacity building, Skill training, Women empowerment and working with community based organizations.

The organization has multidisciplinary committed team of 500+ professionals including consultants

Vision

Expedite synergy for sustainable development

Mission

Our mission is to foster sustainable and socially inclusive development by empowering communities through the enhancement of their resources, knowledge, and capabilities. We aim to elevate their quality of life through strategic interventions and collaborative efforts.

Strategic Interventions and collaborative efforts

Improve living standards

Enhancement of their resources, knowledge, and capabilities

Elevate their quality of life

Foster sustainable and socially inclusive Development

Empowering communities

Expedite synergy

Sustainable development

Thematic Areas

**Natural Resources
Management**

**Livelihood
Enhancement**

**Drinking Water and
Sanitation (WASH)**

**Health and
Nutrition**

**Skill Building,
Education, Sports and
Talent development**

**Promotion of
Community Institutions**

**Training and
Capacity Building**

**Research and
Studies**

**Monitoring &
Evaluation**

Linkages to the Sustainable Development Goals

Arpan is actively working towards global Sustainable Development Goals (SDGs), aligning its efforts with the 9 Sankalp of the hon'ble Prime Minister of India. Our projects are designed with a strong focus on environmental, Social, and Governance (ESG) norms, ensuring that our interventions create lasting, positive impacts while minimizing ecological footprints. We are working towards a future where rural India thrives in harmony with national and global development goals.

Partners

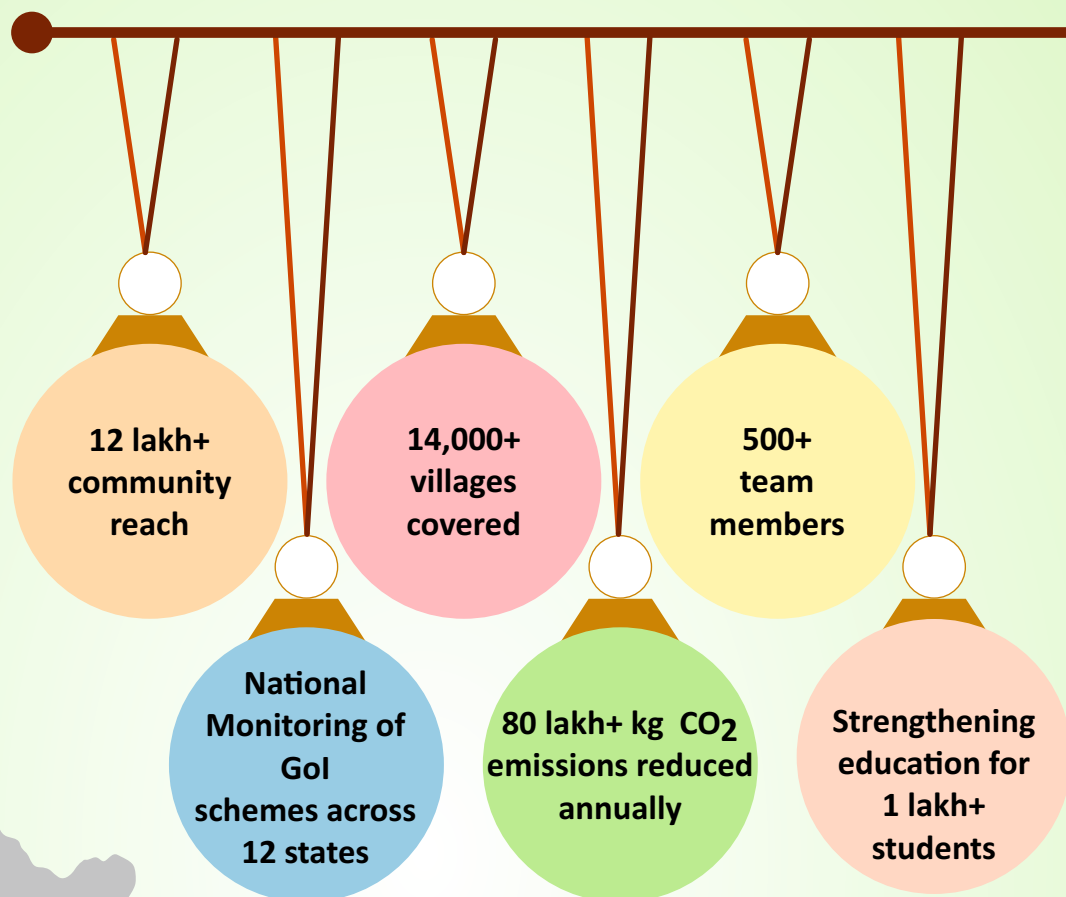

OUR PARTNERS

KNOWLEDGE PARTNERS

Arpan's Outreach and Impact

Natural Resource Management

Arpan Seva Sansthan has consistently upheld a commitment to the preservation and sustainability of natural resources, with a steadfast dedication to ensuring a prosperous future for succeeding generations. Central to our ethos is the imperative to conserve, regenerate, and prudently manage resources such as soil, air, water, flora, and fauna.

- Watershed area coverage : 1,00,000+ ha
- water holding capacity increased to 20,400 million litres
- Increase in ground water recharge : 40,000 million litres
- Watershed DPR preparation : 2 lakh+ ha

Carbon Footprints Reduction

- Plantation over 18 lakh+
- Benefitted 41,000+ communities from 139 villages on solar lights , solar operated tube wells and Bio-gas plants
- 1.8 lakh hours of diesel pumping reduced by installing solar lights and pumps
- ✓ Resulted in 80 lakh+ kg Co₂ emissions reduced annually

Natural Resource Management - Resilient Resources, Thriving Communities

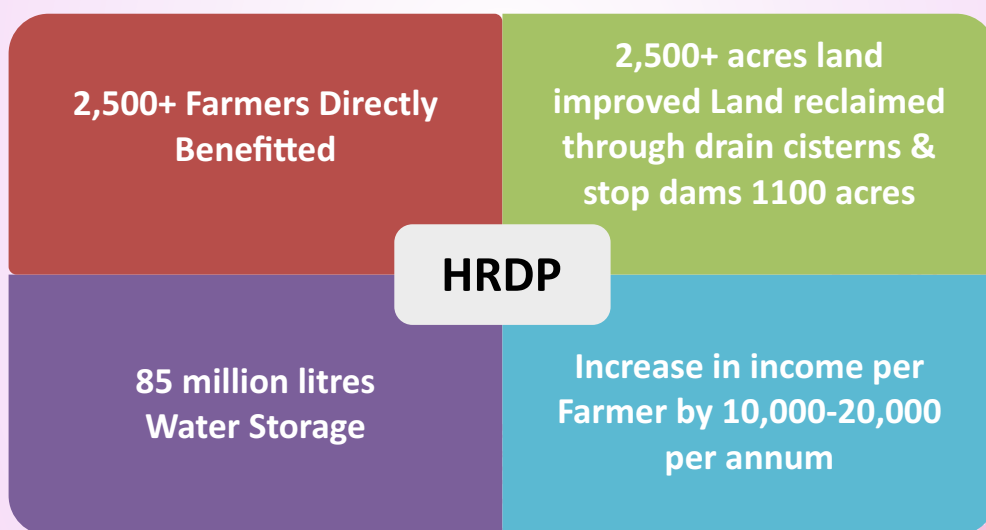

Arpan Seva Sansthan placed strong emphasis on management of Natural Resources during 2024–25, through watershed management, afforestation, and practices related to climate change adaptation forming the core of interventions. Efforts reached thousands of households and led to measurable improvements in water availability, soil fertility, and agricultural productivity.

HRDP – Bhopal, Sehore, and Shajapur districts of Madhya Pradesh

Natural Resource Management formed the backbone of the Holistic Rural Development Programme (HRDP)—Madhya Pradesh project, implemented across Bhopal, Sehore, and Shajapur districts in 65 villages (Bhopal 20, Shajapur 25, Sehore 20) benefitting 72,000+ communities. Various water harvesting and conservation structures—such as stop dams, gabion and check dams, and drain cisterns—were developed to enhance water security and support sustainable agriculture. These efforts improved rainwater harvesting, groundwater recharge, and irrigation access, enabling over 1,100+ acres of farmland to shift from rain-fed to multi-cropping systems. The interventions also promoted soil conservation, reduced erosion, and strengthened ecological sustainability.

Sustainable Agriculture Development- Over 1,500 farmers adopted climate-resilient and sustainable practices, including multi-tier cropping, improved crop varieties, floriculture, fodder development, and vegetable cluster farming. These measures boosted productivity, increased incomes, and built resilient, eco-friendly farming communities aligned with holistic rural development goals.

Overall Impact of NRM (HRDP Madhya Pradesh)

Focused Development Project (FDP) Karauli

The Focused Development Project (FDP) in Karauli district covering 45 villages and benefitting 6000+ households, emphasized soil and water measures across 12,000 hectares. Key interventions included contour bunding, farm bunding, and water harvesting structures. The project also pioneered farmer-led water budgeting and irrigation Scheduled, enabling communities to collectively manage resources. Over 8,000 farmers benefitted and reported reduced crop productivity. Women farmers actively participated in training sessions on composting, bio-fertilizers, and vegetable cultivation

1

Soil and water conservation
on 12,000 hectares

8,000+ farmers benefitted

2

3

Increased crop productivity
by 20–25%

Adoption of water budgeting
practices in 45 villages

4

5

Area increased under
horticulture-40 acres

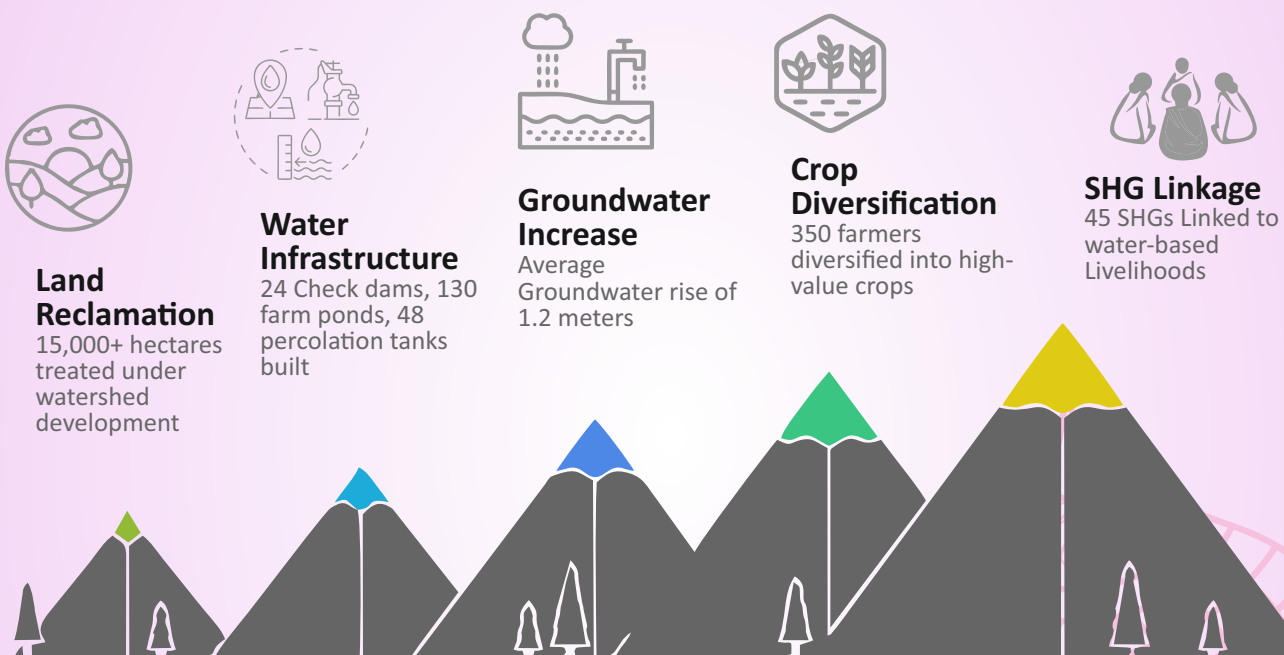

WEZ - Kurabad district of Udaipur (Rajasthan)

Kurabad WEZ is a comprehensive and integrated initiative focused on water and soil moisture conservation measures, reclamation of degraded land, and promoting of pasture development.

Project emphasises excellence in enhanced water use efficiency, and adoption of good agricultural practices. It showcases large-scale crop diversification and the promotion of alternative livelihoods through innovative approaches such as trellis-based vegetable farming, cultivation of Melia Dubia, Proso Millet, and Strawberry, etc.

These efforts are supported and being managed by the active participation of vibrant village institutions, ensuring community-driven development and long-term sustainability in 26 villages benefitting 30,000+ communities.

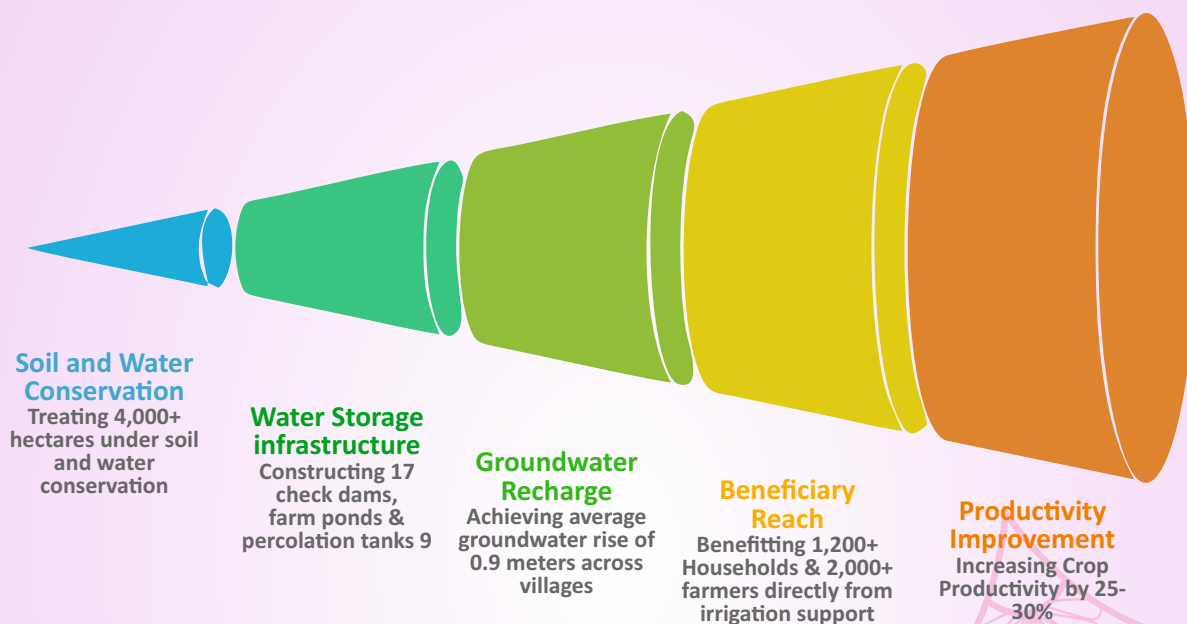

Impact of Watershed Development Initiatives

Water Economic Zone (WEZ) - Khandwa & Katni (Madhya Pradesh)

The Water Economic Zone project in Khandwa and Katni covered 6 villages. The project implemented extensive watershed development interventions. The project area included multiple villages where check dams, farm ponds, and percolation tanks were built. As a result, water availability improved significantly, benefitting agriculture and livestock. Farmers reported improved irrigation, reduced migration, and better access to drinking water, covering households 1228 (Khandwa) and 2281 (Katni), the total population covered was 5638 (Khandwa) and 10303 (Katni) respectively.

Impact of Water Conservation Measures

PRE

POST

CLIMATE-SMART AGRICULTURE

Climate-Smart Agriculture

Climate-Smart Agriculture (CSA) is an on-farm advancement initiative implemented across 11,418-hectare of land in 26 villages within the Kurabad block of Udaipur district of Rajasthan. The project directly benefits over 1,100 smallholder farming households. Its aims to promote sustainable natural resource management while simultaneously strengthening the livelihoods of marginal farmers.

Key interventions included the establishment of Farmers Field Schools (FFS), which enabled continuous peer-to-peer learning on efficient water use practices and climate-resilient farming techniques.

Demonstrations of Climate-Smart Agriculture Practices led to a 15–20% increase in crop yields and a significant 30 % reduction in water usages, contributing to improved productivity amidst challenges of depleting ground water levels.

Comprehensive Water Conservation Plan of Lasadiya Block, Udaipur (Rajasthan)

A comprehensive Water Conservation Plan was formulated for Lasadiya Block, focusing on multiple Gram Panchayats and their households. The study included an assessment of availability of existing number water structures, detailed mapping of natural resources, and analysis of rainfall and land use. A water budgeting exercise highlighted a deficit, for which a range of interventions such as anicuts, ponds, wells, and contour trenching were proposed. The plan also considered livestock needs to ensure holistic water management. The project was supported by Basudao Kanoria Seva Sansthan.

Large-Scale Plantation Drive

Plantation drive

A Plantation drive over 4 acres of hand-holdings to raise the 48,000 plant saplings was undertaken at Silvassa and Dahej in Gujarat. This initiative strengthen the capabilities of local community in ecological restoration, conservation of biodiversity, and offer opportunities for improved livelihoods in response to changing climate conditions.

Earth Day Celebration - Towards a Plastic-Free India

Arpan Seva Sansthan, with support from the Ministry of Earth Sciences, organized an Earth Day workshop at Government Girls Higher Secondary School, Kookra (Bhim block, Rajsamand district of Rajasthan). Students, teachers, and volunteers formed a human chain for environmental awareness and collected 9.7 kg of plastic waste for safe disposal. The event featured role plays and a painting competition on environmental conservation. Outstanding participants were honored with monetary prizes, making the day a true celebration of collective action for a cleaner and greener future.

Livelihood and Skill Development

Arpan Seva Sansthan's livelihood initiatives in 2024-25 focus on strengthening rural economies via promotion of both farm and non-farm based livelihood, diversified income sources, building resilience, and reducing dependence on rain-fed agriculture. Therefore promotion of sustainable farming practices, livestock improvement, skill up-gradation and promotion of micro-enterprises, to empower communities to secure sustainable in-house livelihoods. These efforts not only enhance household incomes but also foster self-reliance and long-term rural prosperity.

- Development of Horticulture Orchards with 2,000+ families
- 1,200+ Micro enterprises and 45% average annual income increase.
- Vegetable cultivation : 1,500+ families & providing market linkage.
- Extensive work with 3 lakh+ farmers in 6 states

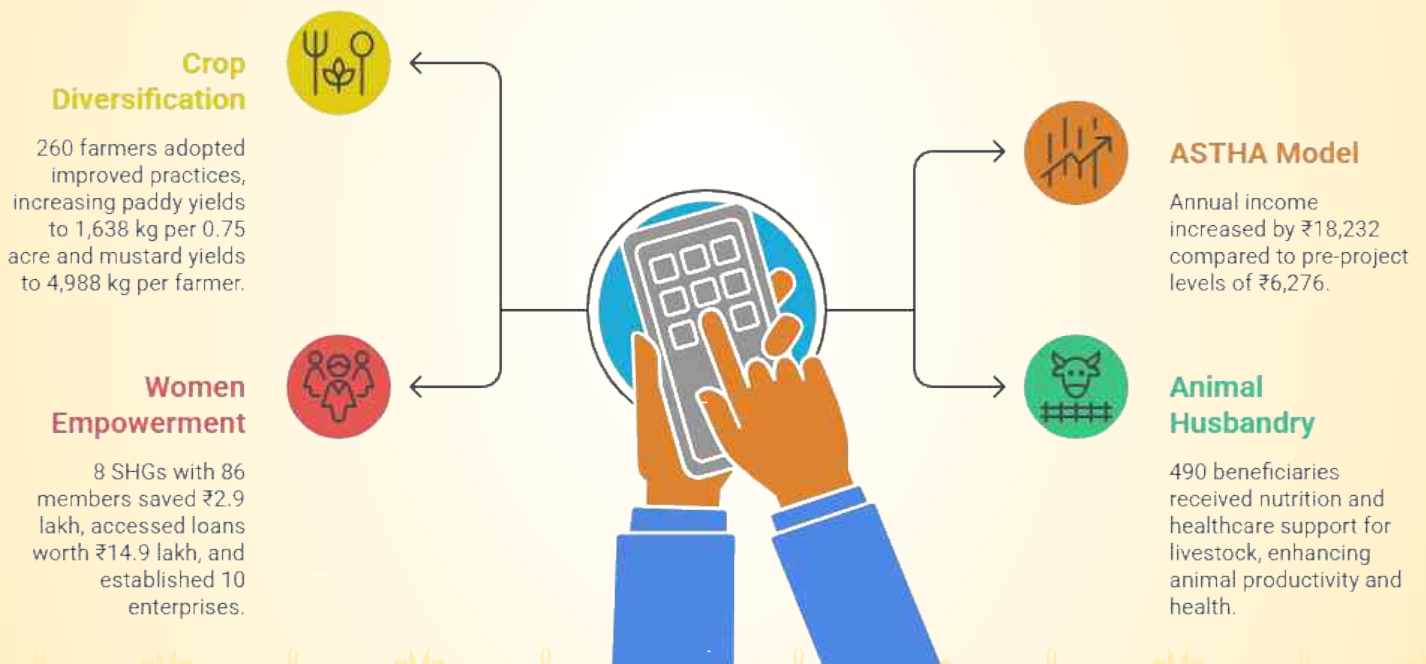

Livelihood Enhancement – Cultivating Opportunities, Enabling Change

Adarsh Farm- Kundanganj, Raebareli (Uttar Pradesh)

Since year 2023-24, Adarsh Farm Project Raebareli is now in its second year. The project aims to promote sustainable agriculture practices and improve livelihoods in rural communities through a holistic approach centered around Climate Smart Agriculture (CSA).

During the reporting period (2024-25), the project has made significant strides in achieving its core objectives of enhancing agricultural productivity, promoting crop diversification, strengthening farmer institutions, and creating sustainable income opportunities. The project has directly benefited over 300 farmers across 12 villages in Kundanganj block benefitting 22,378 communities, with interventions spanning various components including sustainable agriculture practices, capacity building, farm and non-farm livelihood promotion, and animal husbandry.

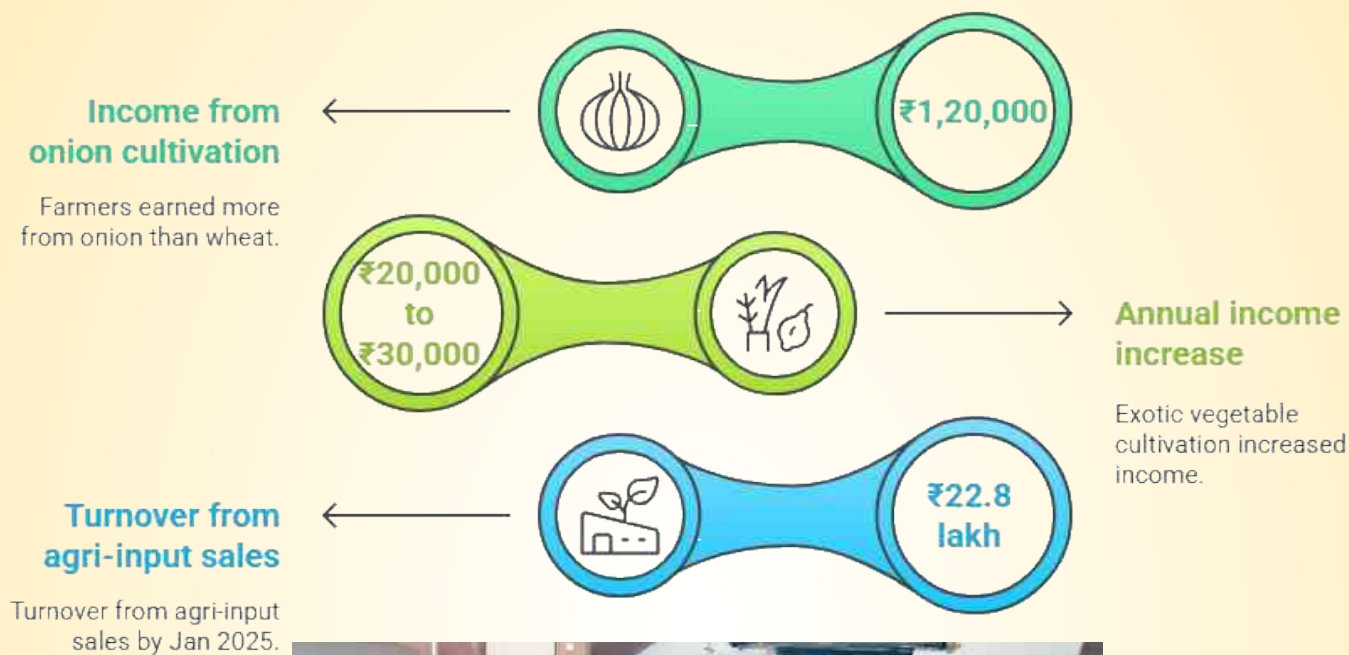

Project Outcomes

Adarsh Farm Project – Maihar, Satna (Madhya Pradesh)

In Maihar, the Adarsh Farm Project expanded Climate Smart Agriculture interventions while promoting micro-enterprises and FPO strengthening of 940 farmers across 5 villages benefitting 21,203 communities. Farmers diversified cropping systems, adopted good agricultural practices, and engaged in value chain development.

Crop Diversification and Income Enhancement

Adarsh Farm Project – Aligarh (Uttar Pradesh)

The Adarsh Project in Aligarh emphasized **nutrition security, livestock management, and sustainable farming practices** for 800 farmers across 3 villages benefitting 10,000 communities. For **913 families directly** and mobilized 4,000+ through trainings, awareness drives, and demonstrations.

200 families developed seasonal Nutrition kitchen gardens

- Hemoglobin levels improved by 6.25% in anemia-tested women
- Households saved ₹500–800 per month on vegetables

Livestock Management

- 1,000+ cattle vaccinated and dewormed
- 200 animals provided calcium & mineral mixtures; milk yield increased by 490 ml (cows) and 332 ml (buffaloes)

Training, Exposure & Crop Demonstrations

- 96 village-level trainings reached 2,443 farmers.
- 428 farmers adopted improved paddy, millet, mustard, and maize
- 10–12% higher productivity; cultivation costs reduced by 15–20%.

Regenerative Agriculture Activities

Improving Soil Fertility and Farm Sustainability with organic Solutions

Arpan Seva Sansthan's livelihood initiatives focused on diversifying income sources, reducing risk from mono-cropping, and promoting sustainable rural enterprises. Efforts across different projects created a balance between farm-based activities (agriculture, horticulture, livestock) and non-farm opportunities (SHG enterprises, skill up-gradation).

Vermicompost & Organic Farming:

To reduce dependency on synthetic inputs and improve soil health, multiple projects promoted natural farming practices. It not only reduced the cost of cultivation but also enhanced soil health and crop yields. Established 17 vermicompost units and promoted 400 low-cost pits that are producing 4512 quintals of manure annually, improving soil fertility, reducing chemical input costs by 20–25%.

❖IMPROVED SEEDS and CROPPING PRACTICES

- **Seed Demonstrations:** 475 improved seed demos across the three districts showed **20–30% productivity gains**.
- Farmers reported additional **income of ₹8,000–12,000 per year** from Rabi crops like wheat, mustard, and gram.
- **Multi-tier Cropping:** 60 farmers in Sehore adopted diversified cropping systems, raising annual **income by 30%**.

Strengthening Rural Livelihoods through Fisheries, Goat Rearing & Poultry

Goatry and small-scale poultry units emerged as a sustainable livelihood for small and marginal farmers, especially women played a leading role in rearing and selling.

- ❖ **HIRDAY (Damoh, MP):** 65 goat units promoted, ensuring sustainable income for marginalized families
- ❖ **HRDP – Shajapur:** 22 poultry units established, benefitting 66 families with additional annual income of ₹80,000–90,000.
- ❖ **HRDP – Sehare:** 4 poultry units with 600 chicks, supporting 12 families.
- ❖ **Fisheries Units:** 2 small-scale fisheries in Sehare, involving 20 farmers, created a new livelihood option.

Nutrition Gardens & Nurseries

Nutrition gardens and nurseries not only improved family nutrition but also generated surplus income from sales.

- ❖ 780+ Backyard kitchen gardens improved household nutrition and incomes.
- ❖ 51 low-cost vegetable nurseries promoted, ensuring timely sapling supply.
- ❖ 50 vegetable clusters commercialized.

Crop Diversification & Improved Practices

Diversification reduced risks of mono-cropping and gave farmers new income avenues through high-value crops. Crop diversification and improved cropping practices reduces risk of mono-cropping, input costs and gave farmers new income through high value crops.

Agricultural Interventions and Training Programs

1

Multi-tier cropping, improved crop demo & seed Production (375 families), floriculture (marigold) with market linkage, and fisheries units.

**HDFC
HRDP-Sehore**

2

375 improved crop demonstrations:
30 multi-tier cropping demos:
133 fodder demos.

**HDFC
HRDP- Shajapur**

3

450 cereal, pulse, and oilseed cultivation demos:
79 micro sprinklers: 90 farmer trainings.

**HDFC
FDP-Karauli**

4

Facilitated mustard seeds to 130 farmers, wheat seeds to 220, and trained 7 Krishi Mitra: organic farming pilots raised farmer incomes.

**LTIMindtree
IVDP**

Wadi / Horticulture Development

Horticulture-based “Wadi” models were promoted by NABARD as long-term livelihood assets for tribal and marginal farmers, combining fruit trees, timber, and intercropping for sustainable income. These interventions are expected to secure their household incomes over 5–7 years while improving soil and water conservation.

❖ TDF – Ratlam & Madhya Pradesh:

- **Coverage:** 450 tribal families engaged in Wadi development across 10 villages of Bajna Tehsil, Ratlam district (Madhya Pradesh).
- **Income Impact:** Farmers have already started earning from guava; reported collective income of **₹9,45,000** in 2024–25.
- **Survival Rate of Plants:** Out of **450 Wadis** – **378 Wadis** had more than **90% survival** other **72** had **80-85% survival**.
- **FPO Linkage:** A Farmer Producer Organization (FPO) was formed, supplying **40 quintals of wheat seed** at below-market rates to 103 farmers.

❖ FDP – Karauli: 500+ Wadi plots developed with fruit (guava, lemon) and timber species (neem, ber, bamboo) supported by intercropping of pulses and vegetables.

❖ HIRDAY – Damoh: 50 households supported with horticulture/nutrition orchards to enhance food security and supplement incomes.

RWSLIP- Rajasthan Water Sector Livelihood Improvement Project

The project addresses deteriorating irrigation systems in Rajasthan to improve water use efficiency, agricultural productivity, and rural livelihoods. The project covers 27 districts of Rajasthan.

- Objectives include rehabilitation of irrigation facilities, strengthening Water Users Associations (WUAs), diversifying agriculture, promoting high-value crops, and gender mainstreaming.

Institutional Strengthening

324 functional WUAs with trained leadership and transparent governance systems

324 Women Wings ensuring gender-inclusive water governance

324 Farmer Interest Groups enabling collective action and market access

Capacity Enhancement

25,000+

Cascading Model

100% Coverage

Over 25,000 capacity-building interventions reaching thousands of farmers

Cascading training model with ToTs creating sustainable knowledge transfer systems

100% coverage of all WUAs with multiple training cycles

Gender Transformation

14,997 women
14,997 women actively
participating in WUA
governance structures

Systematic gender
mainstreaming
**Systematic gender
mainstreaming** across all
program components

392 women's SHGs

procurement

Introducing Strawberry Cultivation in Udaipur

Achievement in Livelihood

With technical support facilitated by Arpan Seva Sansthan, farmers in Udaipur have successfully introduced strawberry cultivation—a crop traditionally grown in colder regions like Jammu & Kashmir, Himachal Pradesh, and Meghalaya. This pioneering effort is now yielding results across 26 villages, engaging 82 farmers in high-value horticulture. Each farmer invested around ₹30,000 per unit of 2,100 sq. ft., and within a single season, their earnings have doubled to ₹60,000, showcasing strawberry as a profitable diversification option. The crop, which ripens in winter months, is finding strong market demand with prices reaching ₹300 per kg in the hotel industry. This intervention has opened new avenues for cash crop diversification, climate-resilient farming, and improved farmer incomes, positioning Udaipur as a new hub for strawberry production in Rajasthan.

संडे पॉजिटिव रंग ला रहे एनजीओ के प्रयास...सितंबर-अक्टूबर में होती है बुवाई, अब पकने को आई फसल, जल्द बाजार में आएगी
ठंडे प्रदेशों की स्ट्रॉबेरी अब उदयपुर में भी घोल रही रस, जिले के 26 गांवों के 82 किसान कर रहे खेती, खर्च 30 हजार रु., कमाई दोगुना, 60 हजार रुपए तक

सिटी रिपोर्टर | उदयपुर

जम्मू-कश्मीर, हिमाचल, मेघालय जैसे ठंडे प्रदेशों की फसल स्ट्रॉबेरी अब इस आदिवासी अंचल के किसानों को भी रास आने लगी है। जिले के कुराबड़ ब्लॉक में दो साल से इसकी खेती को जा रही है। नतीजे देखकर धीरे-धीरे नए किसान भी इससे जुड़ रहे हैं। पिछले साल 15 किसानों ने यह पहल की थी। इस बार 26 गांवों के 82 किसान स्ट्रॉबेरी उगा रहे हैं। फसल लगभग तैयार है, जो जनवरी से मार्च के बीच बाजार में लाई जाएगी।

कृषि विभाग के साथ मिलकर एरिया में नवाचार कर रहे एनजीओ अर्पण सेवा संस्थान के प्रयासों से यह सब हो पाया है। समन्वयक रमेश कुमार सुखवाल ने बताया कि हर किसान को 500-500 पौधे निशुल्क दिए थे। बुवाई 15 सितंबर से 15 अक्टूबर

होलसेल रेट 300 रु. प्रति किलो

यह होलसेल में करीब 300 रुपए प्रति किलो की दर से बिकता है। यानी हर किसान को 60 हजार की आमदनी होगी। इसमें करीब 10 हजार पौधों रुपए खाद-दवा और खरपतवार रोकने के लिए शीट लगाने, 10 हजार रुपए मजदूरी-पैकिंग और करीब 10 हजार रुपए खेत पर नेट (जाल) लगाने और बिजली-पानी पर खर्च होते हैं।

तक की गई। फसल 40 से 50 दिन बाद अब पकने आई है। पिछले साल किसान कम थे, इसलिए महज 30 किंटल उत्पादन हो पाया। इस साल 164 किंटल उपज मिलना तय है। किसान को 25 से 30 हजार रुपए तक का मुनाफा होगा। क्योंकि स्ट्रॉबेरी के हर फार्म में 500 तक पौधे लगाए जाते हैं। इनसे करीब 2 किंटल फल मिलता है।

महज 2100 वर्गफीट जगह काफी, 30 डिग्री तक पारा भी मुफ्रीद

सुखवाल ने बताया कि स्ट्रॉबेरी को खेती शुरू करने से पहले सभी संभावनाएं-आशंकाएं तलाशीं। कृषि विभाग के विशेषज्ञों ने बताया कि 150 से 200 स्क्वायर मीटर यानी 1600 से 2200 वर्गफीट के छोटे प्लॉट में भी इसके पौधे लगा सकते हैं। इसके लिए 20 से 30 डिग्री तापमान मुफ्रीद रहता है। न्यूनतम 4 डिग्री तक रह जाए, तब भी नुकसान नहीं होता। ये

स्थितियां उदयपुर में खेती के लिए जल से उपयुक्त लगीं। दरअसल, कृषि विभाग ने 10 साल पहले स्ट्रॉबेरी की खेती की संभावनाओं की तलाश में यहां की जलवायु, मिट्टी आदि को परखा था। करीब 10 किसानों को इसकी ट्रेनिंग भी दी, लेकिन कोई प्रोजेक्ट नहीं आया। इसलिए विशेष काम नहीं हो सका। मार्केटिंग की समस्या भी थी। नतीजतन किसानों ने दिलचस्पी नहीं दिखाई।

कृषि विभाग नया प्रोजेक्ट बनाकर खेती को बढ़ावा देगा
जिला परिषद के कृषि विस्तार के संयुक्त निदेशक सुधीर वर्मा का कहना है कि विभाग स्ट्रॉबेरी की खेती को बड़े स्तर पर करने के लिए योजना बना रहा है। आदिवासी अंचल में छोटी जोत होने से इसकी आसानी से खेती की जा सकती है। 150 से 200 स्क्वायर मीटर के खेत भी काफी हैं। सरकार की मदद से किसानों को निशुल्क पौधे देकर खेती करवाएंगे। इससे ग्रामीणों की आय बढ़ेगी।

Success Story: Multi-Tier Guava Farming Transforming Rural Livelihoods

Under the Holistic Rural Development Programme (HRDP) supported by HDFC Bank Parivartan and implemented by Arpan Seva Sansthan, multi-tier guava farming has emerged as a sustainable livelihood model in rural Madhya Pradesh. Sangeeta Bai from Semli Khurd (Sehore) is one strong example—earlier earning only ₹20,000–25,000 annually from soybean and wheat, she adopted Taiwan Pink Guava and seasonal vegetables on one acre and earned ₹6,13,500 in three years, achieving a net income of ₹5,78,500 after a small investment of ₹35,000.

Inspiration for Other Farmers

Her visible success motivated farmers from nearby villages, especially women, to adopt fruit-based multi-layer farming for better income and year-round production. Sangeeta's farm became a demonstration site, encouraging many households to shift from traditional single-crop practices.

Government Recognition and Replication

Seeing the strong outcomes and media coverage, the district administration has identified guava-based multi-tier farming as a scalable and sustainable model. The government is now promoting large-scale plantation, farmer training, and cluster-level replication so that more farmers can benefit from this resilient livelihood system.

सरकार करेगी मार्केटिंग: किसानों को फसल बेचने में नहीं करनी होगी मशक्कत, जिले की 200 पंचायतों में 16 क्लस्टर से जुड़ रहे किसान

शरबती के बाद अब सीहोरी अमरुद, दो हजार एकड़ में लगेगा बगीचा

पहले साल में ही 4.15 लाख अमरुद के पौधे लगाएंगे, 30 जुलाई तक होगा बगीचा तैयार

कलरूप सारस्वत
saraswata.com

सीहोरी, जहाँ को खाने का पंचा बनाने के लिए सरकार सीहोरी में प्रयोग कर रही है। मेरु, सीहोरी और चने के साथ जिले में 30 करोड़ रुपए की लागत से दो हजार एकड़ में अमरुद का बगीचा लगाने की कार्ययोजना बनाई है। अमरुद की खेती के लिए, 200 पंचायतों को 16 क्लस्टर में बाँटकर किसानों का चयन किया जा रहा है। हर पंचायत में करीब 10 किसानों की क्लस्टर में लिखा जाएगा। दूसरा यह है कि सरकार ने फसल किसानों को अमरुद की खेती के लिए एक एकड़ पर 1.80 लाख रुपए देगी, बालिका फसल की बेगने के लिए मार्केटिंग भी करेगी।

पहले चरण में 2000 एकड़ में अमरुद की खेती होगी। सीहोरी चने की खेती भी किसान कर सकेंगे।

किसानों को फसल बेचने में शिक्का नहीं होगी। प्रोसेसिंग युनिट के काम से रक-साहयक समूह को जोड़ा जाएगा।

दूसरे चरण में अमरुद की प्रोसेसिंग युनिट लगाने का काम होगा।

अभी एक साल में सिर्फ दो फसल भंडू और चने की पैदावार होती है।

फसल बेचने कंपनियों से अनुबंध

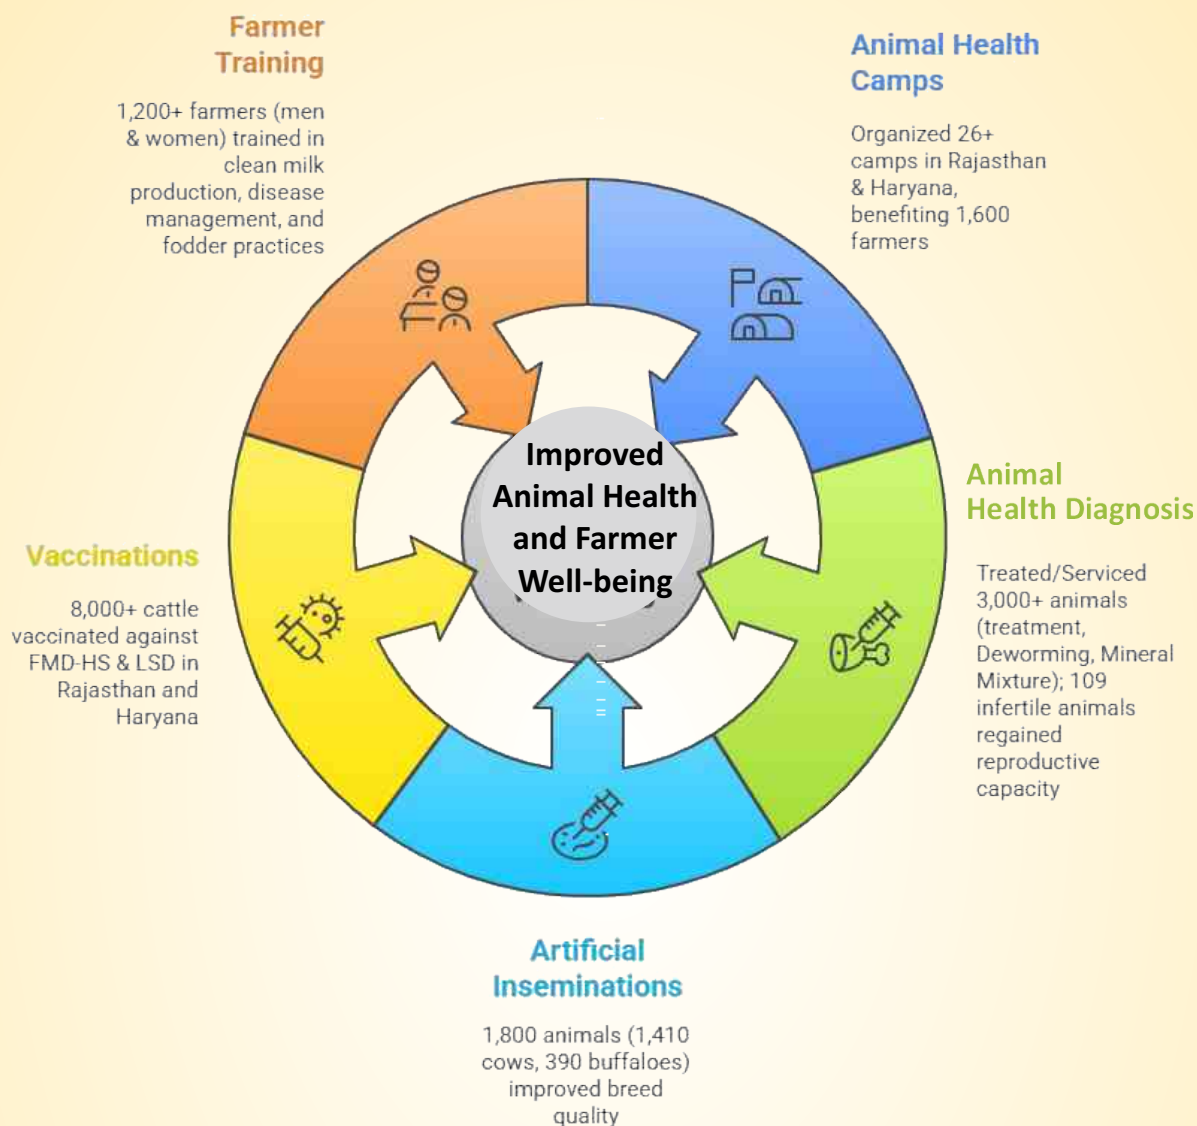

किसानों को उनकी फसलों का अच्छा भाव मिले, इसलिए फसल बेचने के लिए जिला प्रशासन कंपनियों से अनुबंध करेगा। पहले साल में 2000 एकड़ में 4.15 लाख अमरुद के पौधे लगाएंगे। इसके लिए जिले से 1700 किसानों का शिवागरी के रूप में चयन किया जा रहा है। जिस फायदा में ही उनसे लिखा है।

बाताया कि 15 से 30 जुलाई तक बगीचा तैयार किया जाएगा। इसी दौरान पौधारोपण भी हो जाएगा। इससे पहले उद्योगिकी विभाग किसानों को इस खेती की ट्रेनिंग देगा। अच्छी किस्म के भी पौधे देगा। कार्ययोजना तीन विभाग उद्योगिकी, कृषि, खेती और पंचायत एवं ग्रामीण विकास विभाग के ज़रिए चलेगी।

जिले में क्लस्टर बनकर अमरुद के बगीचे लगाने की कार्ययोजना पर काम चल रहा है। इससे किसानों की आय बढ़ेगी। परंपरागत खेती से हटकर नया करने का मौका मिलेगा। सरकारी से इसका फायदा मिलेगा।

प्रवीण सिंह,
क्लस्टर सीहोरी

Animal Health Initiatives and Farmer Support

Skill Development - Building Rural Capacities for Self-Reliance

Skill development was a cross-cutting intervention across projects, designed to empower youth, women, and farmers with vocational, financial, and technical skills. These initiatives reduced migration, supported self-employment, and promoted confidence among rural communities.

3500+ women
trained across SHGs
on enterprise,
financial literacy,
tailoring, food
processing, and

across HRDP, Adarsh,
ICDP, TDF, and FDP
projects

Farmer Producer Organization (FPO) Development - Ringus Kisan Agro Producer Company Ltd.

- ❖ **Members/Shareholders Farmer:** 750
- ❖ **Shareholder Equity:** ₹15 lakh mobilized
- ❖ **Villages Covered:** 20
- ❖ **Block Covered:** 02 (Khandela & Sri Madhopur, Sikar)
- ❖ **Governance & Capacity:** 8 training programs conducted; 44 Board of Directors & CEO meetings organized; 3 Annual General Meetings (AGMs) held.

- ❖ **Financial Support:** Nabkisan loan of ₹5 lakh sanctioned; Business Development Assistance (BDA) of ₹5 lakh received.
- ❖ **Business Units:**
 - One unit for animal feed and mineral mixture production, along with a milk processing unit (for rasgulla and mawa making), was set up to promote dairy development
 - Two agriculture-input shops were established, providing seeds, fertilizers, and pesticides
- ❖ **Turnover & Profit:** FPO recorded a turnover of ₹52 lakh in 2024–25 with a net profit of ₹5 lakh.

RSLDC- Rajasthan Skill & Livelihoods Development Corporation

Under the Rajasthan Skill and Livelihoods Development Corporation (RSLDC), Arpan Seva Sansthan successfully implemented two transformative skill development initiatives: the Mukhya Mantri Kaushal Vikas Yojana and the Mukhya Mantri Nari Shakti Kaushal Samarthya Yojana. These programmes were designed to empower youth and women through comprehensive vocational training and livelihood enhancement opportunities.

Youth Training

100 youth trained across Construction, Tourism & Hospitality, and Agriculture sectors

Women's Empowerment

110 women trained in Domestic Worker and Beauty & Wellness trades

Employment Success

80% placement rate through industry linkages and placement support

Programme Impact

The trainings focused on enhancing both technical and practical skills, making participants **job-ready and self-reliant**. Around 70% of trained youth secured employment opportunities through strategic

Women's Transformation

Many women gained the confidence to pursue **self-employment or wage-based work**, contributing significantly to their family income and social upliftment in their communities.

1

Skill Development

Comprehensive vocational training programmes

2

Employment Linkages

Industry connections and placement support

3

Economic Growth

Inclusive, skill-based regional development

These initiatives collectively strengthened livelihood opportunities, reduced unemployment, and promoted **inclusive, skill-based economic growth** in the region.

Women Empowerment – Strengthening Voices, Building Futures

- Facilitated livelihood and skill development of women through On-Farm and Non-Farm interventions
- Market linkages & value addition through 10 FPOs, 4 Federation & 560 SHGs
- 500 SHGs of De-notified Tribes community of Rajasthan and Uttar Pradesh states formed

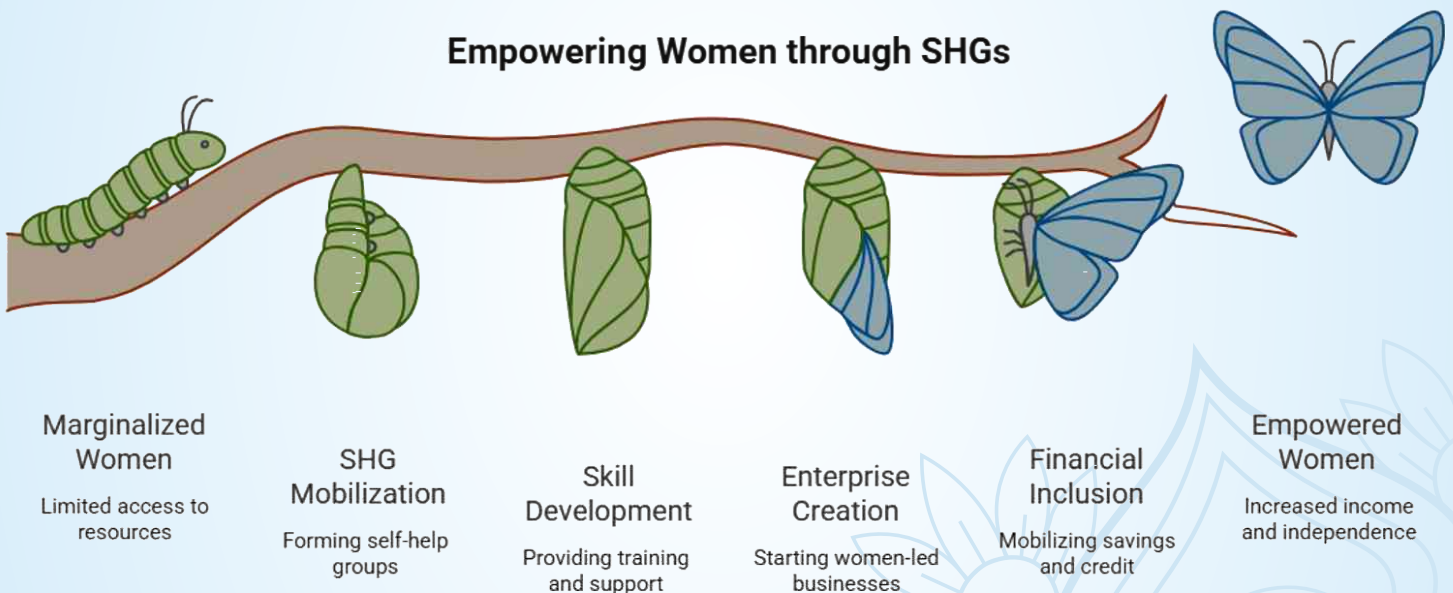

Women Empowerment - Building Confidence and Change

Arpan Seva Sansthan has placed women at the center of its development initiatives, believing that empowered women transform not only their families but entire communities. Across different projects, thousands of women have been mobilized into Self-Help Groups (SHGs), trained in financial literacy, skill development, and leadership.

Women have taken up diverse livelihood opportunities such as tailoring, food processing, goat rearing, and dairy management. Through credit linkages and savings, they have been able to access financial independence, reduce dependence on moneylenders, and build micro-enterprises.

Beyond income, women now participate confidently in Gram Sabhas, Village Development Committees, and Farmer Producer Organizations, ensuring their voices are heard in decision-making. Many have become role models, inspiring other women in their villages to step forward. Arpan's women empowerment journey demonstrates that when women are supported with skills, resources, and confidence, they create lasting change for generations.

Empowering Women through SHGs

Magra Mahila Samiti: From Struggle to Strength

The women of Kookra and Lasadiya villages in rural Rajasthan once lived in silence—bound by poverty, drought, patriarchal traditions, domestic violence, and lack of education. Many were denied rights, forced into early marriages, and left without hope for a better future. Change began when Arpan Seva Sansthan entered their lives, recognizing their potential and organizing them into self-help groups. Over time, 100 groups with more than 1,200 women were formed, giving them financial independence, skills, and the confidence to stand for their rights. The success of these groups led to the creation of Magra Mahila Samiti, a federation that provides an organizational platform for women. Today, the Samiti runs sewing centres and markets garments like suits, Rajputi poshaks, and frocks, improving family incomes and women's decision-making power. Collectively, their earnings have grown substantially, transforming the lives of hundreds of families. Behind this success is the guidance of Arpan Seva Sansthan, which focuses on education, skill development, health awareness, women's safety, and social change.

Empowering Women Through SHGs

Mobilization

6500+ women organized into SHGs

Training

200+ sessions conducted to enhance skills

Enterprises

300+ women-led businesses started

Savings

₹20–25 lakh mobilized through SHGs

Credit Linkages

₹30.9 lakh in credit facilitated

Income Increase

₹10,000–20,000 annual rise in household incomes

Collective Earnings

₹15–20 lakh estimated earnings from enterprises

On 8th March, we honoured their strength,
resilience and the profound impact they have in
building communities by celebrating
'Women's Day'
in all the projects of Arpan Seva Sansthan

NBCFDC-DNT Livelihood Initiative under SEED Scheme

Under the Scheme of Ministry of Social Justice of De-notified, Nomadic, and Semi-Nomadic Tribes (SEED), Arpan Seva Sansthan is implementing livelihood activities in 11 districts of Rajasthan (Jaipur, Dausa, Karauli, Dholpur, Bharatpur, Chittorgarh) and 4 districts of Uttar Pradesh (Agra, Mathura, Mainpuri, Firozabad) with support from NBCFDC and NSCFDC, Ministry of Social Justice & Empowerment (MoSJE), Government of India.

SEED Initiative Framework

District Coverage

The initiative spans 6 districts in Rajasthan and 4 in Uttar Pradesh.

SHG Formation

Establishment of 500 SHGs to empower DNT women.

Training and Development

Providing training, workshops, and skill development opportunities.

Community Engagement

Involves meetings, surveys, and PRA to understand community needs.

Entitlement Facilitation

Assisting in opening bank accounts and registering for entitlements.

Impact:

The initiative is mobilizing De-notified tribal communities, building women-led SHGs, improving access to entitlements, and creating pathways for sustainable livelihoods through credit access, skill development, and enterprise promotion.

Education - Empowering Minds, Building Futures

Strengthening education for 1 lakh+ students across 700 schools

HIRDAY Project (Damoh, Madhya Pradesh)

- **School Support:** Strengthened local schools with basic infrastructure and remedial classes.
- **Skill Training for Students:** Focus on extracurricular learning and personality development.
- **Impact:** More than **300 students** directly benefitted with improved attendance and retention.

Gram Seva Project- Kherwara, Udaipur

- **Computer Lab:** To provide essential computer knowledge, fostering digital literacy and enhancing learning experience amongst rural students computer lab has been established.
- **Smart Class for Students:** Smart classrooms have been set to provide smart learning technologies and online resources to the students.
- **Open Gym/Playground:** To improve sports facility, physical fitness and encourage a healthy and active lifestyle among students, open gym/playground has been set in school premises.
- **Remedial Classes:** To reduce drop outs and support students in need remedial classes were conducted in all project villages.

IVDP (Sawai Madhopur, Rajasthan)

- Training and rallies were conducted in 13 schools to create awareness on child rights.
- Celebrated National girl child day in all 13 schools and painting competitions were organized.
- Conducted 13 nukkad natak programs reaching 1443 beneficiaries.
- Establishment of 13 learning resource centres.

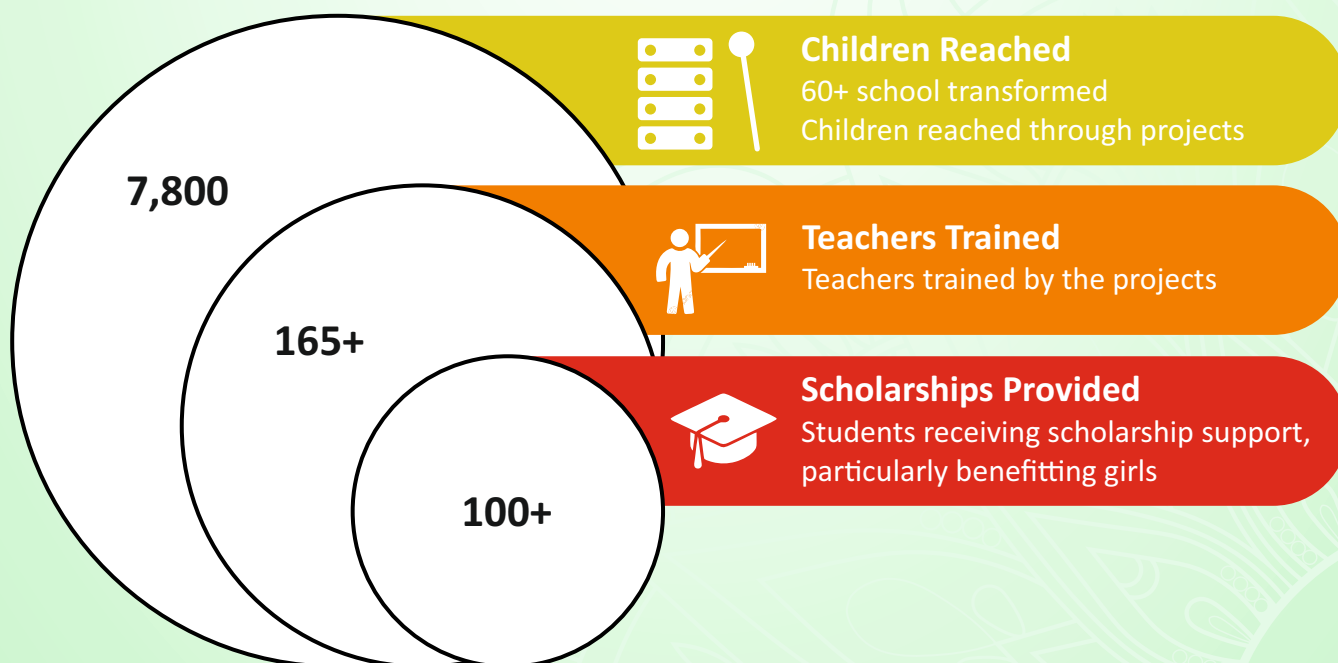

Digital Literacy & AI-Coding Project (Ajmer, Rajsamand, Pali – Rajasthan)

- **Coverage:** 10 government schools across 3 districts; **2,508 students** enrolled (65.9% girls, 27.6% tribal students).
- **Teachers Engaged:** 15+ trained in digital tools and AI concepts.
- **Curriculum:** Scratch programming, Artificial Intelligence basics, and Learning Management Systems (LMS).
- **Location-Wise Beneficiaries:** 1,816 in Ajmer, 355 in Rajsamand, 337 in Pali.
- **Impact:** Students gained computational thinking and digital literacy; significant increase in girls' participation (65.9%).

Impact on Children Through Projects

IVDP, Gangapur City - Bal Sansad

Bal Sansad is formed in 13 schools benefitting 2834 children in which 16 school children playing major role; in which each school has a child elected as a Prime Minister and Deputy Prime Minister.

These children participate and lead all the school activities and create awareness among all children

Sports Excellence – Supporting Emerging Talent

In 2024–25, Arpan Seva Sansthan, initiated a specialized program titled “From Local to Global: Nurturing Excellence in Pistol Shooting for International Recognition.” The project focused on enhancing the skills and competitive performance of Mr. Omprakash Choudhary, a national-level pistol shooter from Barmer, Rajasthan. Through targeted support in advanced coaching, upgraded sports equipment, participation in major national and international competitions, and holistic fitness and mental conditioning, the initiative has laid a strong foundation for his international career. This unique intervention reflects Arpan's commitment to fostering sports excellence and creating role models from rural and modest backgrounds, inspiring young athletes to dream bigger and pursue sports as a career path

A thrilling one-day sports competition took place at Gram Panchayat Asariwada, under the Gram Seva Project, powered by Arpan Seva Sansthan and SBI Foundation! From Kho-Kho to the quirky Jalebi race, the event had it all!

The event was a fantastic display of talent, sportsmanship, and community spirit!

Health and Nutrition - Empowering Health, Enriching Lives : Comprehensive Care for Every Age, Every Stage...

Health and Nutrition

Zero Dose & FI Missed Children Initiative (Udaipur, Churu, Rajsamand & Sikar, Rajasthan)

Project Overview

- Launched : 2024
- Supported by : GAVI & UNICEF
- Partner : Arpan Seva Sansthan
- Coverage : 18 block, 4 districts (Udaipur, Churu, Rajsamand, Sikar)
- Timeline : 2024-2026

Objectives

- Identification & tracking of Zero dose Children
- Community-supported systems for follow-up
- Training influencers, SHGs & frontline workers
- Capacity building to reduce vaccine hesitancy
- Strengthening data Management & monitoring

Key Achievements (2024-25)

- 491 Zero Dose children linked to immunization
- 140+ special vaccination sessions conducted
- 102 families linked with Ayushman Bharat
- 92 PMMVY beneficiaries
- 117 supported under Janani Suraksha Yojana

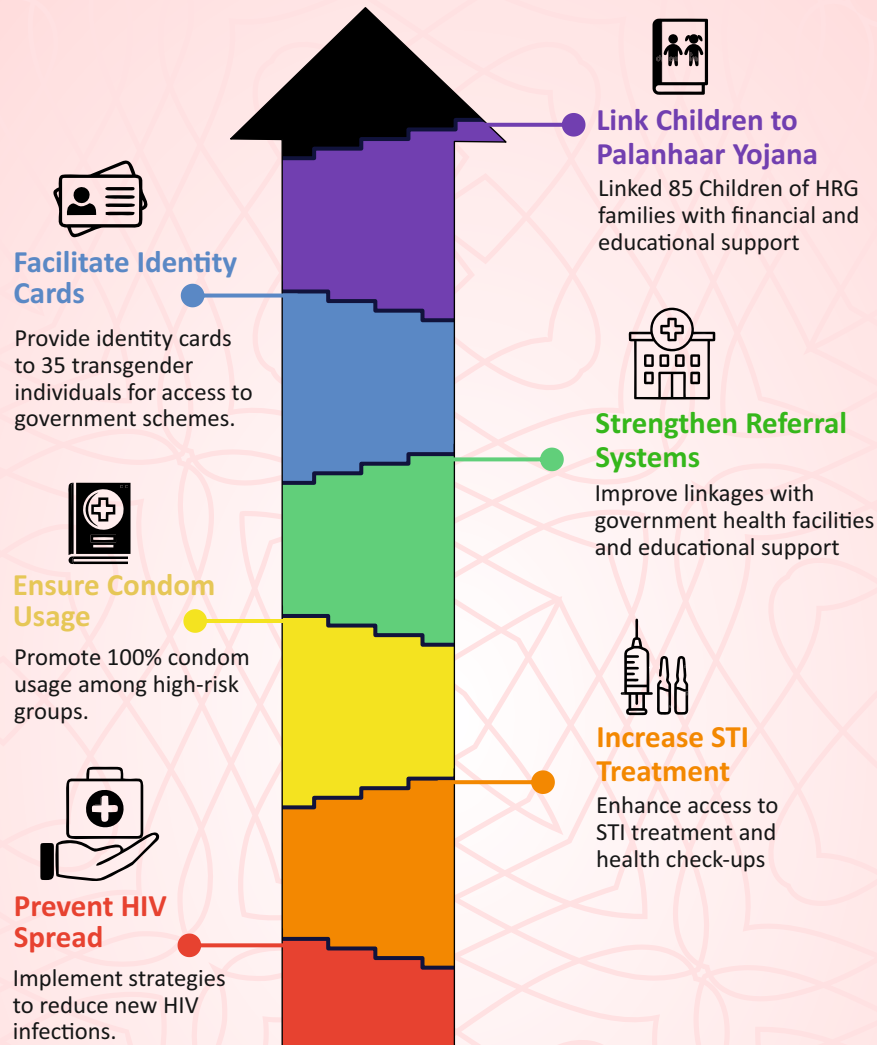

Impact

- Door-to-door surveys & counseling
- Coordination with health workers
- Bridging immunization gaps
- Preventing vaccine-preventable diseases
- Ensuring equitable healthcare access

Targeted Interventions (TI) – Chittorgarh, Rajasthan

Since 2008, Arpan Seva Sansthan has been implementing the Targeted Interventions (TI) Project in Chittorgarh district, supported by NACO through RSACS, focusing on High-Risk Groups (HRGs) including 300 Female Sex Workers (FSW) and 200 Men who have Sex with Men (MSM).

SBI Gram Seva – Udaipur, Rajasthan

Gram Seva Program: Health Initiatives

Initiative	Description
Health Camps	Multiple camps in 5 villages (Asariwada, Bhilwara, Damorwada, Ranawada, and Rehta) benefitting over 600 people in Q4 (Jan- Mar 2025) through OPD services, free medicines, and awareness drives on immunization and nutrition.
School Health Check-ups	Specialized check-ups reached more than 140 children.
Sanjeevani Van	Provided emergency referrals, including transporting a critical asthma patient 66 km to Shraddha Hospital in Gujarat.
Infrastructure Works	Renovation of two sub-health centres (Bhilwara and Asariwada), installation of RO drinking water systems in four schools, and new borewells serving schools, Anganwadis, and gram Seva Kendras.

IVDP – Sawai Madhopur, Rajasthan (*Health Linkage*)

- Health awareness is integrated into IVDP village development approach. Sessions conducted for adolescent girls and village women on **menstrual hygiene, nutrition, and reproductive health**, reaching more than **250 girls** with life skills and health education.
- Organized 4 health awareness and check-up camps benefitting 331 beneficiaries .
- Distributed kitchen garden seeds to 313 households and 13 trainings provided on kitchen garden

Uniting for a Life-saving Cause: Blood Donation Camp

Arpan Seva Sansthan, in collaboration with the ex-students of Sainik School, Chittorgarh, and SMS Hospital Blood Bank, organized a highly successful blood donation camp. The event was graced by the Hon'ble Justice of the High Court Jaipur along with esteemed Army officers, state government officials, public leaders, youth, students and advocates.

Our dedicated staff joined the noble cause by donating blood, exemplifying true community spirit. Together, we've demonstrated that collective action can save lives and strengthen our community.

Celebration of Poshan Maah

Arpan Seva Sansthan actively celebrated Poshan Maah 2024 across multiple project locations, reinforcing the commitment to improve maternal and child nutrition. Recognizing that malnutrition continues to be a critical challenge in rural and marginalized communities, Poshan Maah served as an opportunity to create awareness, promote healthy practices, and mobilize community participation.

Need for Intervention:

In many of Arpan's operational areas, undernutrition among children, anemia in adolescent girls and women, and lack of dietary diversity remain pressing issues. These challenges not only affect health but also hinder education outcomes and overall community development. Addressing them requires a blend of awareness, behavioral change, and access to nutrition-based solutions.

Key Activities Conducted:

Awareness sessions for mothers and caregivers on balanced diets, exclusive breastfeeding, and complementary feeding.

Nutrition demonstrations showcasing preparation of low-cost, high-nutrient meals using locally available foods.

Growth monitoring camps where children were weighed and measured, with counseling given to parents.

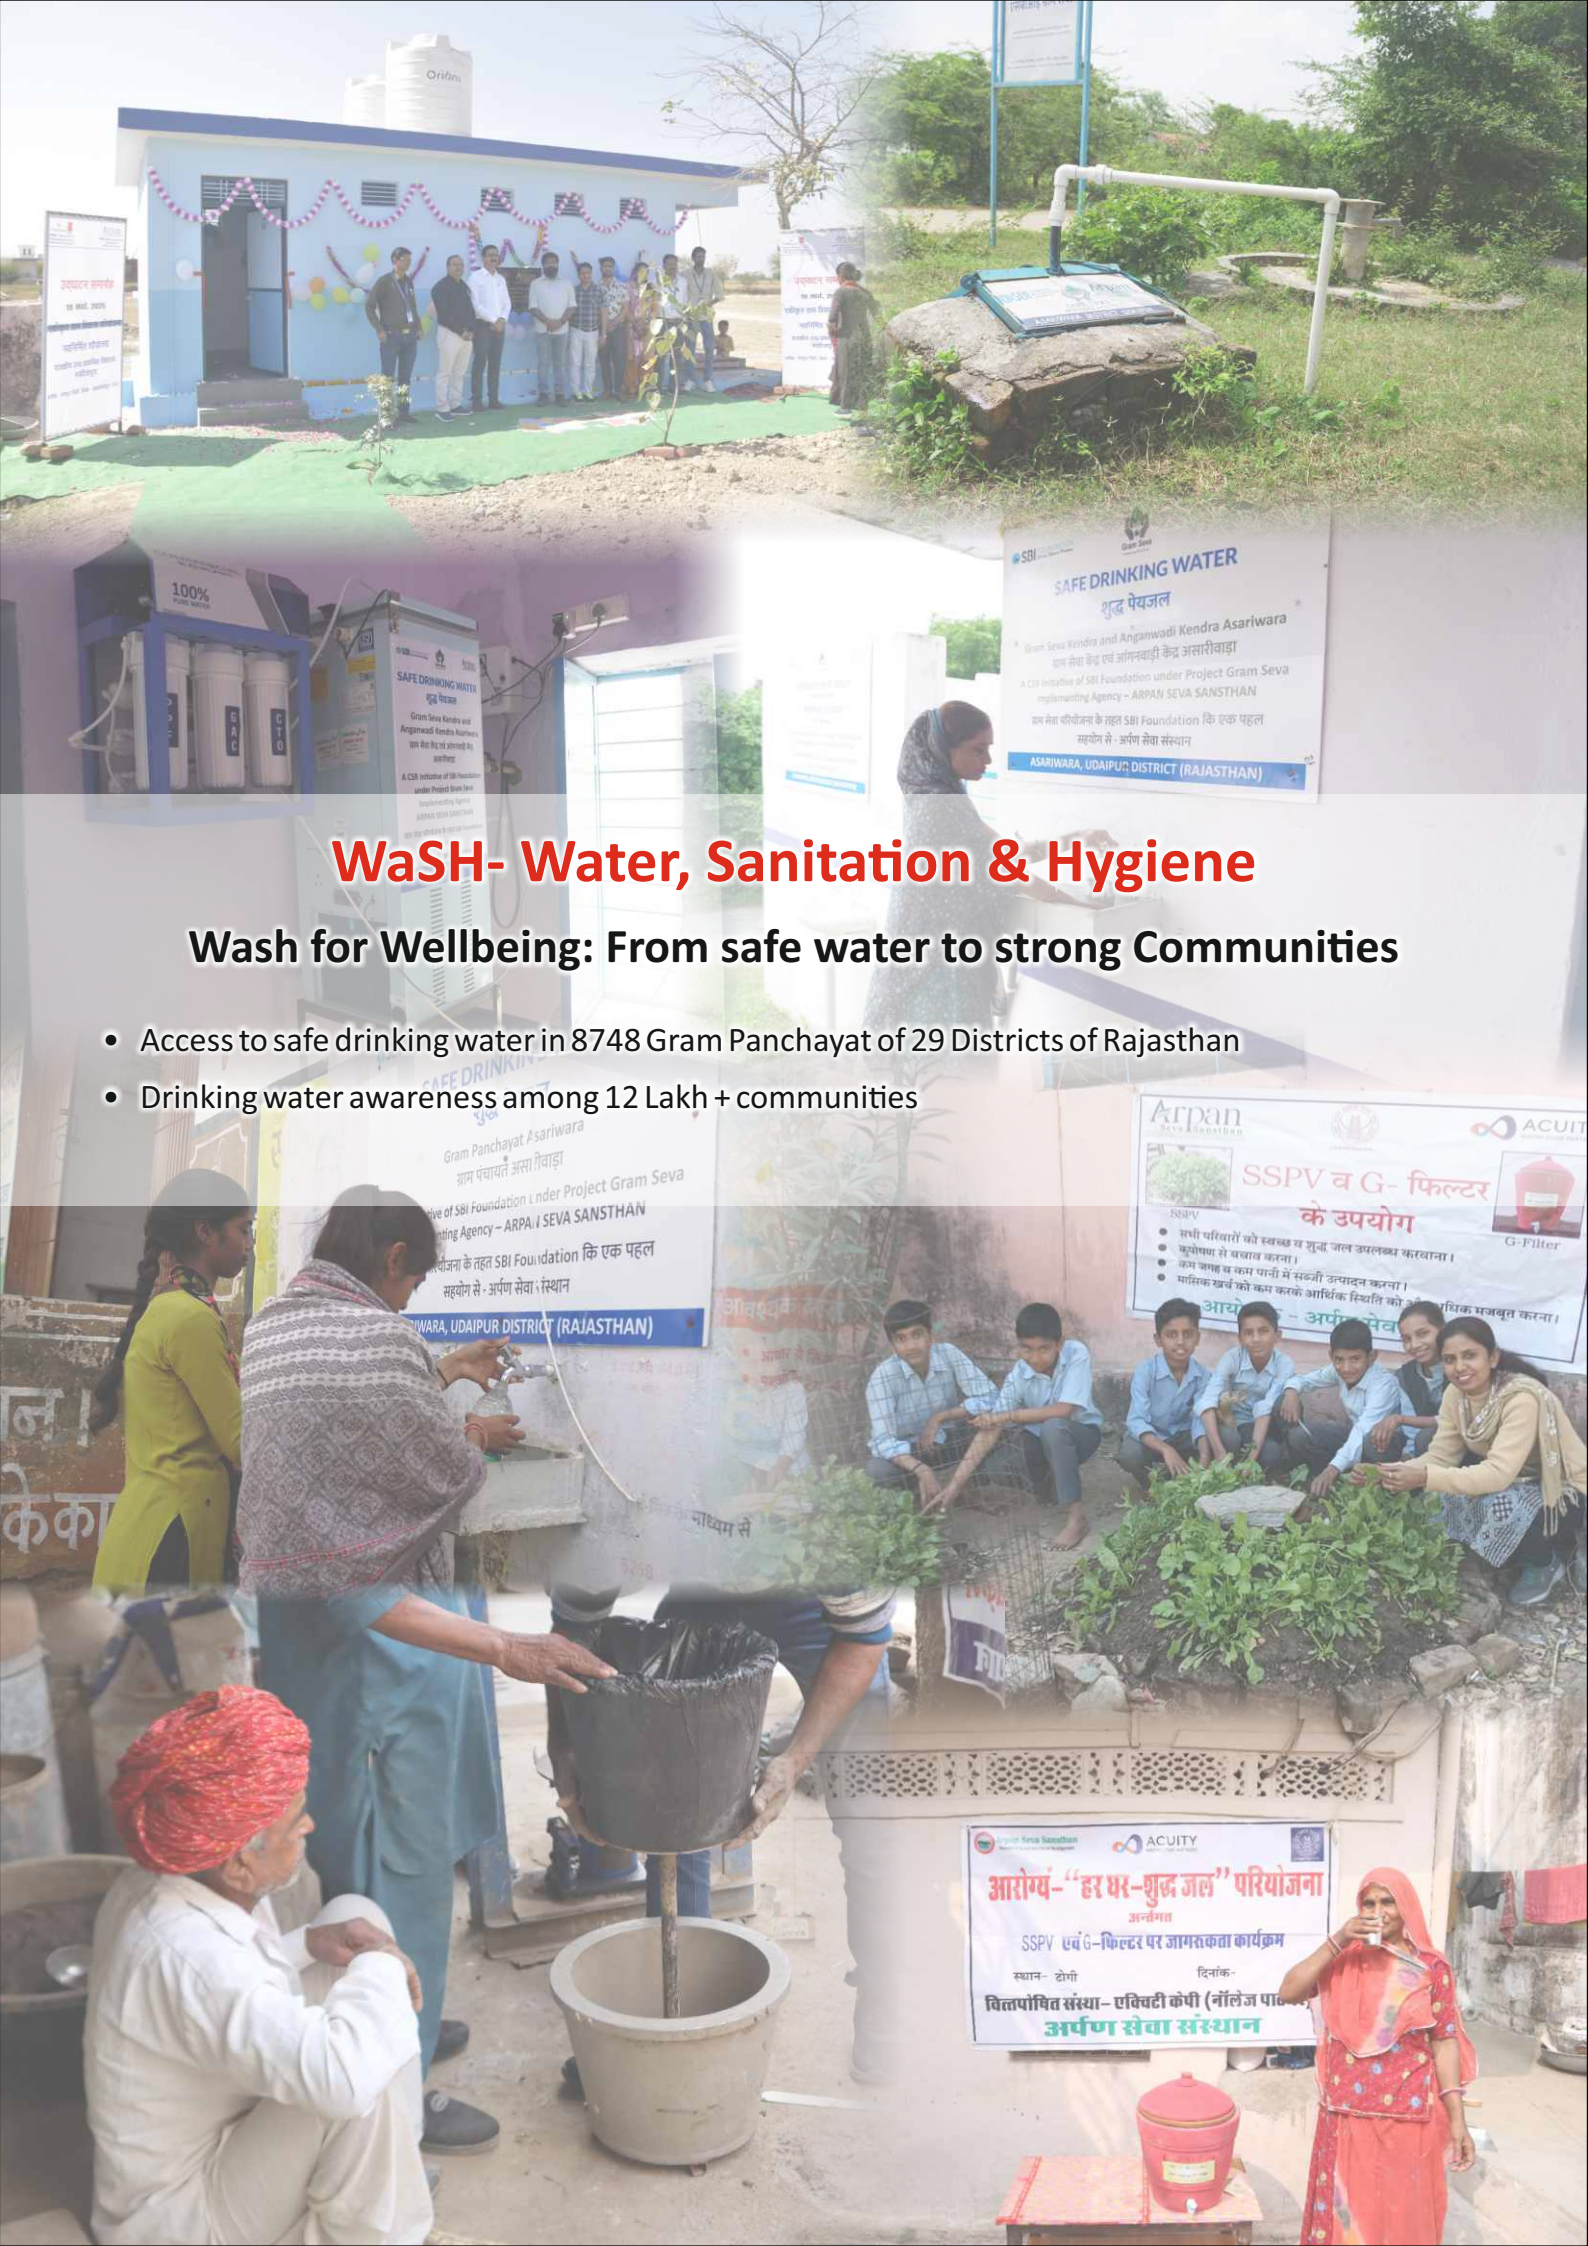

Kitchen/Nutrition gardens promotion in households and schools to ensure year-round availability of vegetables and fruits.

Community rallies and campaigns involving SHGs, school children, and frontline workers to spread the message of “Sahi Poshan Desh Roshan.”

Health check-ups and anemia screening for adolescent girls and women, with linkages to government health schemes.

Through these activities, Poshan Maah became a collective movement in Arpan's project villages, engaging thousands of women, children, and community stakeholders. The initiative not only raised awareness but also encouraged families to adopt sustainable nutrition practices, contributing to healthier and more resilient communities.

WaSH- Water, Sanitation & Hygiene

Wash for Wellbeing: From safe water to strong Communities

- Access to safe drinking water in 8748 Gram Panchayat of 29 Districts of Rajasthan
- Drinking water awareness among 12 Lakh + communities

Aarogyam - Har Ghar Shuddh Jal

Livelihood through Safe and Affordable Drinking Water & Reducing Water Usage in Irrigation

The AROGYAM project was implemented in **Bhim block (Rajsamand district)**, and **Jobner block (Jaipur district)**. Together, the initiative covered more than **20 Gram Panchayats** across **2 districts**, reaching **thousands of households, schools, Anganwadis, and community institutions**.

Target groups included **rural households, women and children, SHGs, potter communities, and smallholder farmers**.

Gram Seva – Udaipur, Rajasthan

Under the Gram Seva project, WaSH has been a key focus: Safe Drinking Water: RO plants installed and functional in 4 government schools; new borewells installed in Bhilwara, Damorwada, Asariwada, benefiting schools, Anganwadi centers, sub-health centers, and Gram Seva Kendras. Sub-Health Centre Upgrades: Improved water supply and sanitation facilities at Bhilwara and Asariwada health sub-centres. Community Awareness: Health and hygiene awareness camps integrated into school and SHG activities, covering more than 500 school children and women. Nutrition Gardens: Linked to WaSH for improving dietary diversity and hygiene at household level.

Integrated Village Development Project

- Created 3 school toilets separately for girls and boys at Government upper primary school, Macheteapura, Gram Panchayat Raipur. This helped for better hygiene and sanitation among children. Dustbins installed at all 12 Anganwadi and 13 LRC centres.

National Level Monitoring

Arapn has conducted NLM visits across 12 states , covering 90 districts, 375 blocks, and 785 Gram Panchayats across India. Our team comprises over 100 experience professionals including retired government officer, monitoring and evaluation specialist , management experts, technical professionals, and social development experts.

Schemes Monitored:

- Mahatma Gandhi National Rural Employment Guarantee Scheme (MGNREGS)
- Deendayal Antyodaya Yojana- National Rural Livelihood Mission (DAY-NRLM)
- Pradhan Mantri Awas Yojana- Gramin (PMAY-G)
- National Social Assistance Programme (NSAP)
- Pradhan Mantri Gram Sadak Yojana (PMGSY)
- Survey of Villages and Mapping with Improved Technology in Village Areas (SVAMITVA)
- Deen Dayal Upadhyay Gramin Kaushal Yojana (DDU-GKY)
- Sansad Adarsh Gram Yojana (SAGY)
- Pradhan Mantri Krishi Yojana (PMKSY)
- Digital India Land Record Modernization Programme (DILRMP)
- Gram Panchayat Infrastructure initiatives

Participation in NITI Aayog's Sampurnata Abhiyan Utsav

Arpan Seva Sansthan actively participated in the Sampurnata Abhiyan Utsav, a campaign initiated by NITI Aayog to strengthen development outcomes across 39 key indicators, including health, education, livelihood, and agriculture. The event was organized in the Akansha Block of Gangapur City, where Arpan showcased its work and community-driven models through an informative awareness stall. The stall, focused on watershed development and sustainable rural practices. As part of the campaign, Arpan also organized training sessions for Anganwadi workers to strengthen grassroots service delivery, and conducted nukkad natak (street plays) to spread awareness among community members on key social and developmental issues. This recognition and engagement stand as a testament to the commitment and hard work of Arpan's team, motivating us to continue advancing sustainable, inclusive, and impactful development practices.

Celebrations of International Yoga Day

Arpan Seva Sansthan observed International Yoga Day 2024 across multiple project locations to promote holistic health and well-being. The celebrations brought together students, women's groups, community members, and staff for collective yoga sessions led by trained instructors. Participants practiced asanas, pranayama, and meditation techniques, learning about the role of yoga in reducing stress, improving immunity, and fostering a healthy lifestyle. Awareness talks were also organized to encourage communities to adopt yoga as part of their daily routine for physical, mental, and spiritual balance. The event highlighted Arpan's commitment to not only development interventions but also to nurturing a culture of wellness and preventive healthcare in rural areas.

Independence Day Celebrations

Arpan Seva Sansthan celebrated Independence Day 2024 with great enthusiasm across all project locations, from city streets to rural villages. The events brought together students, women's groups, farmers, and community leaders in a collective spirit of unity and patriotism. Flag hoisting ceremonies, cultural performances, and awareness rallies highlighted the importance of freedom, responsibility, and community service. By engaging diverse groups, the celebrations not only honored the nation's independence but also reaffirmed Arpan's commitment to building a stronger and more inclusive society.

Rural Haat inauguration - Empowering Farmers and Rural Enterprises

Arpan Seva Sansthan inaugurated a vibrant Rural Haat near Reengus on the Sikar–Jaipur Highway. The marketplace marking a significant milestone in strengthening rural livelihoods and farmer collectives. The Rural Haat provides local farmers and Farmer Producer Organizations (FPOs) with a dedicated platform to showcase and sell fresh produce, dairy products, and artisanal goods directly to consumers. In addition to farm produce, the haat features a dairy development unit, offering high-quality cattle feed and Pure Mawa Mithai, supporting both nutrition and income-generation. Designed as a one-stop destination, the Rural Haat connects farmers, rural entrepreneurs, and consumers, ensuring fair prices, reduced middlemen, and better market access. This initiative not only promotes sustainable livelihoods but also fosters community entrepreneurship and rural economic growth.

KISAN SAMMELAN at Kundanganj (Uttar Pradesh)

On 31st January 2025, Arpan Seva Sansthan, organized a large-scale Kisan Sammelan as part of its CSR initiative. The conference witnessed the enthusiastic participation of 650 farmers representing 12 villages. The program featured agriculture exhibitions, knowledge-sharing sessions, and interactive dialogues between farmers and experts on best practices in agriculture, livestock management, and sustainable farming. The event also celebrated and honored progressive farmers for their outstanding contributions, motivating others to adopt innovative approaches. This initiative marked a significant step toward empowering farmers, strengthening agricultural livelihoods, and building resilient rural communities.

Vande Bharat Oxy Park

The Vande Bharat Oxy-Park Project, implemented by Arpan Seva Sansthan, transformed barren land near Balotra Railway Station into a sustainable green space between March–October 2024. The initiative focused on two key areas: Environmental sustainability – development of boundary walls, walking tracks, LED lighting, rainwater harvesting, drip irrigation, and large-scale plantation of native, desert-adapted, and medicinal species. Community well-being – establishment of WaSH (Water, Sanitation & Hygiene) facilities including public toilets, drinking water stations, drainage, open gym, play areas, and recreational spaces. The project improved air quality, biodiversity, and microclimate regulation while providing safe, accessible, and hygienic community spaces. It was formally handed over to Nagar Parishad, Balotra in November 2024 for long-term maintenance. Aligned with several Sustainable Development Goals (SDGs), the project demonstrates an effective public-private partnership model for urban rejuvenation, enhancing both environmental health and community life.

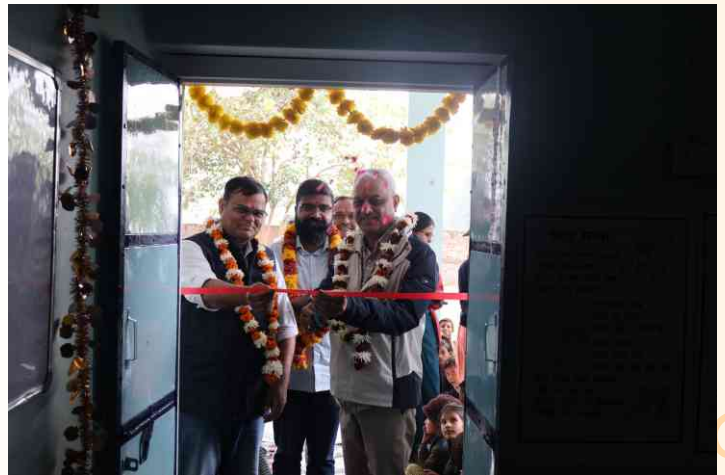

BEFORE

AFTER

Inauguration of Learning Resource Center (LRC) at Haripur Village, Gangapur City

Arpan Seva Sansthan inaugurated a Learning Resource Center (LRC) at Haripur village, Gangapur City, Rajasthan. The LRC has been established as part of the Integrated Village Development Programme (IVDP), a holistic initiative designed to strengthen development outcomes across Agriculture and Allied Services, Education, Empowerment/Livelihood, and Health. This program aligns with the Aspirational Block Programme indicators of NITI Aayog, ensuring interventions are targeted and impactful. The Learning Resource Center will serve as a vibrant hub for children's education and community learning, equipping rural youth with better opportunities and creating pathways for holistic village development. 13 Learning Resource Centers (LRC) have been established benefitting 1400+ communities. This initiative, reaffirm our commitment to inclusive growth and sustainable transformation in rural Rajasthan.

Launch of Holistic Rural Development Programme (HRDP) in Bhopal

On 19th February 2025, Arpan Seva Sansthan launched the Holistic Rural Development Programme (HRDP) in Bakaniya Village, Phanda Block, Bhopal District. The program was inaugurated with immense enthusiasm in the presence of distinguished guests. The event witnessed the participation of more than 1,500 villagers, reflecting strong community ownership and anticipation.

The HRDP initiative seeks to create sustainable and inclusive rural development by focusing on:

- Enhancing agricultural practices and promoting sustainable farming
- Improving irrigation and water conservation through watershed interventions
- Promoting education and skill development for rural youth and children
- Empowering women through Self-Help Groups and livelihood diversification

This initiative marks a new chapter in rural development for Phanda Block, aiming to uplift farmers, empower women, and ensure improved access to education and resources. The program is expected to bring long-term socio-economic transformation and pave the way for a more resilient and prosperous rural community in 20 villages benefitting 4121 households and 20,610 population.

Inauguration of Focused Development Program (FDP) – Karauli

Arpan Seva Sansthan inaugurated the Focused Development Program (FDP) in Masalpur, District Karauli. The program was launched with the vision of driving sustainable growth, agricultural development, and community empowerment in the region covering 6000+ households.

The FDP aims to enhance natural resource management, promote sustainable agriculture, strengthen women's empowerment, and improve rural livelihoods, ensuring long-term benefits for the community of 400+farmers across 45 villages.

This inauguration marks a significant step forward in transforming Karauli district, laying the
